The All-in-one ATS + CRM

built for Indian Staffing Agencies

Sales Presentation · 2026

Tileshwar Consulting Services Pvt. Ltd.

Who We Are

Tilcons (Tilleshwar Consulting Services Pvt. Ltd.) is the **first all-in-one ATS + CRM** purpose-built for Indian staffing agencies — not a retrofit of US software.

1

Unified workspace
ATS + CRM + Reports

8

Pipeline stages tuned
for Indian staffing

₹INR

GST / TDS / PF / ESI
ready out of the box

AI

Resume matching
and candidate ranking

The Problem with Today's Staffing Stack

1

Too many tools

ATS + CRM + Spreadsheets + WhatsApp + Email
— context lost between systems.

2

Imported, not built for India

Naukri-first sourcing, GST invoicing, PF/ESI fields
are afterthoughts in US/EU tools.

3

Expensive licensing

Per-recruiter dollar pricing makes scale
unaffordable for Indian agencies.

4

No AI advantage

Manual screening burns hours. Resume-to-JD
matching is still keyword search.

One Platform. Every Stage of Hiring.

ATS

Jobs, candidates, 8-stage pipeline, interviews

CRM

Clients, deals, submissions, account mgmt

Hotlist

Bench marketing, instant submissions

AI

Resume match, ranking, Agastya chatbot

Sourcing

Naukri-first, LinkedIn, free boards

Compliance

GST, TDS, PF, ESI, INR invoicing

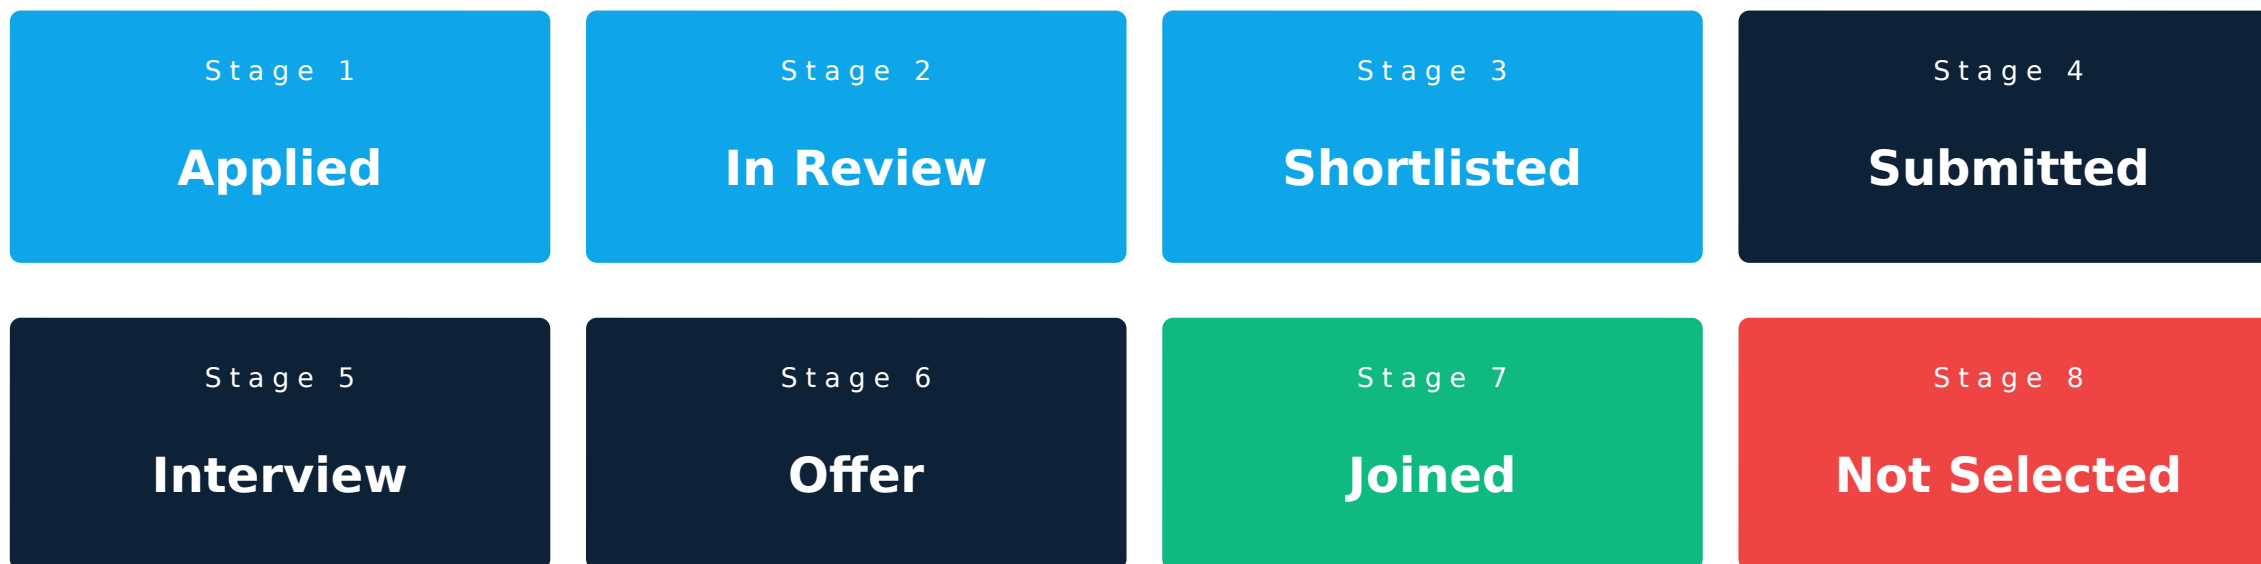

SECTION 01

ATS — Applicant Tracking

Track every candidate from Applied to Joined

8-Stage Hiring Pipeline

Visualise every candidate's journey. Auto-log every status change.

Demo talking point: open the ATS workspace → drag a candidate from Shortlisted to Interview → show the Activity tab auto-log.

Candidate 360° Panel

Every candidate has 4 tabs — one panel, every action.

Pipeline

Current stage, JD, application history, drag to move stage.

Activity

Auto-logged status changes, interviews, submissions + free-text notes.

Interviews

Schedule phone/video/onsite. Track status, feedback, interviewer.

Submit

Send to CRM client with rate, notes. Auto-logs into Activity.

Hotlist & Bench Marketing

India-specific feature. Maintain a live hotlist of available consultants and pitch them instantly.

- ✓ One-click toggle to add any candidate to the hotlist with private notes.
- ✓ Dedicated 'Hotlist / Bench' tab in the ATS sidebar.
- ✓ Submit directly to any CRM client with rate and notes — auto-logs activity.
- ✓ Recruiters can quickly answer the daily 'kaun available hai?' question.

Interviews & Client Submissions

Interviews

- Mode: Phone / Video / Onsite
- Interviewer name + date/time
- Status: Scheduled / Done / No-show / Rescheduled
- Feedback notes captured inline
- Auto-logs into candidate Activity tab

Submissions

- Link candidate to CRM client
- Capture rate offered (₹) and notes
- Status: Submitted / Shortlisted / Rejected / Hired
- Ownership-scoped (recruiter sees only their clients)
- Activity log makes audit trail effortless

SECTION 02

CRM — Client Relationships

Manage clients, deals and revenue pipeline

Multi-tenant CRM

Client master

Contact, industry, status (active/dormant/prospect), notes.

Deal pipeline

Stages: lead → qualified → proposal → won/lost. ₹ values + probability.

Owner-scoped data

Every record carries an ownerId — cross-account access blocked at storage layer.

Real-time stats

Live cards for total clients, open deals, won ₹ this quarter.

Zod-validated

Email format, enum stages, UUID FK checks — clean data, always.

SECTION 03

AI Capabilities

Where Tilcons earns its name

AI Built In, Not Bolted On

Resume Matching

Score every candidate against the JD on skills, role and experience. 92% match scores at a glance.

Candidate Ranking

Sort the pipeline by AI confidence — top 10 candidates surface in seconds.

Agastya Chatbot

Public-site assistant powered by OpenAI. Answers candidate FAQs, lists open jobs, captures employer JDs.

Activity Insights

Roadmap: AI summaries of recruiter activity, predicted joining probability per candidate.

SECTION 04

Built for India

Naukri-first. INR-first. GST-ready.

Indian Staffing, Out of the Box

Naukri-first sourcing

Post once, distribute to Naukri, LinkedIn and free boards (roadmap Q3 2026).

INR pricing

Per-recruiter rupee pricing — no dollar sticker shock.

GST / TDS / PF / ESI

Compliance fields and exports designed for Indian regulations.

Hinglish-friendly UI

Built by Indians, for Indian recruiters and candidates.

Hotlist culture

Bench marketing is a first-class feature, not an afterthought.

TRUST

Security & Privacy

Multi-tenant isolation

Every CRM record owner-scoped. Cross-account reads blocked at storage layer.

Script password hashing

No plain-text passwords. Sessions secure, httpOnly, 7-day expiry.

Hashed reset tokens

32-byte random reset tokens, only SHA-256 hash persisted. 1-hour expiry.

Sanitised admin APIs

Hotlist / candidate endpoints never return password or reset-token fields.

Zod validation everywhere

Every API request validated server-side before storage.

Public Roadmap — We Ship Transparently

LIVE TODAY

- ATS · 8-stage pipeline
- CRM · clients + deals
- Hotlist / bench
- Interviews
- Submissions
- Activity log
- Agastya AI chat

ATS + CRM in one tool	✓	✓	✓	✓
Built in India, for India	✓	—	—	—
Naukri-first integration	✓ (roadmap)	—	—	—
GST / TDS / PF / ESI ready	✓ (roadmap)	—	—	—
INR per-recruiter pricing	✓	—	—	—
Hotlist / Bench module	✓	Partial	—	—
AI resume matching	✓	✓	✓	Partial
Open public roadmap	✓	—	—	—

ROI for a 10-Recruiter Agency

Time saved on screening (AI matching)

~12 hrs / recruiter / week

Faster client submissions (one-click submit)

30 → 5 minutes per submission

Reduced tool sprawl (ATS + CRM + sheets → 1)

Save ₹30K-₹80K / month on tools

Improved fill rate (hotlist + ranking)

+15-25% on warm roles

Cleaner audit trail (auto activity log)

Zero hours rebuilding hiring history

20-Minute Demo Script

0-2 min

Intro & qualification — agency size, current tools, biggest pain (use 'Who We Are')

2-6 min

ATS walkthrough — open /admin/ats, drag candidate through 8 stages, open Activity tab

6-10 min

Hotlist & bench — toggle a candidate, show 'Hotlist / Bench' sidebar, submit to client

10-14 min

CRM — add a client + deal, show pipeline ₹ totals, demonstrate owner scoping

14-17 min

AI — Agastya chat on landing page, mention resume-match roadmap

17-20 min

Roadmap & close — show public /roadmap, confirm trial via /get-started

Objection Handling Cheatsheet

"We already use Ceipal / Bullhorn / JobDiva."

Built for Indian staffing — Naukri, GST, INR pricing, hotlist culture. Migration support included.

"Some modules are still on the roadmap."

Yes — public roadmap (we don't hide). Core ATS + CRM + AI is live. You get launch pricing now.

"How is the AI different?"

Resume-to-JD scoring, not keyword search. Built on OpenAI. Agastya bot live on the public site.

"What about data security?"

Multi-tenant isolation at storage layer. Script hashing. Hashed reset tokens. Zod-validated APIs.

"Pricing?"

Per-recruiter INR pricing. Free trial via /get-started. Discount for early India agencies.

Let's Get Started

Book a 20-minute demo and walk away with a working ATS + CRM workspace.
